

# Elematic 2001 Case Packer.

WRAP-AROUND (WA), TRAY & HOOD (WAH)

## FLEXIBILITY

The Elematic 2001 is a high-speed case packer and offers great flexibility on a small footprint. The Elematic 2001 is a configurable case packer, covering the range from compact, cost-efficient basic machines to flexible pack styles and complex high performance variants.

With the Elematic 2001, wrap-around cases and tray and hood cases can be packaged on one machine. The case packer was designed with a reduced footprint and offers maximum flexibility in terms of different pack styles. The high performance case packer covers speeds of up to 40 cases per minute. There is also a standard speed version with up to 25 cases per minute available.

## CHANGEOVER

Format changes are fast, easy and reproducible thanks to the Elematic click system. Most format changes take less than six minutes.

## EASE OF USE

The case packer stands out for its compact and ergonomic machine design. The Elematic 2001 was designed to allow the operation and loading of the magazines from one side. A complete integrated hotmelt system secures safe refilling.

## SUSTAINABILITY

Thanks to a newly developed blank feed movement, the Elematic 2001 has a higher tolerance for blanks that are slightly bent due to humidity and changing temperatures. As a result, fewer blanks need to be thrown away, contributing to a more sustainable production.

## Your Benefits

### Reliability

- ▣ Designed for 24/7 production
- ▣ Components of the case packer are based on standardized and configurable modules
- ▣ Small-footprint and high performance

### Ease of use and high availability

- ▣ Ergonomic blank magazine height
- ▣ High blank capacity
- ▣ Good accessibility
- ▣ Easy-to-clean design
- ▣ Visibility of packaging process

### High flexibility

- ▣ Fast format changeovers based on Elematic click system
- ▣ Wide format range
- ▣ Different pack styles
- ▣ Wrap-around and tray and hood on one machine
