

Sustainable Solid Board Trays

Sustainable, glue-free tray forming.

REPLACE YOUR PLASTIC TRAYS WITH A COMPLETELY GLUE-FREE PAPERBOARD SOLUTION.

Lock style carton forming is the ideal technology to produce sustainable, completely glue-free trays for your confectionery and cookie (biscuit) products. Kliklok, a division of Syntegon Technology, is the inventor of this technology and has more than 75 years of experience in supplying reliable lock style paperboard forming machines. The Syntegon formers produce out of one blank a precise formed and locked tray.

Multiple options for further packaging are available within the Syntegon group. Whether you prefer tray loading, flow wraps, multipacks, cartoning and/or case packing, Syntegon will offer you the best system solution to match your requirement.
